

Lithium-ion range 2009

Tough tools for professionals

Satisfying the professional's needs

LITHIUM-ION

The quickest, lightest and most powerful battery technology.

Makita presents the evolution of a battery and charging system with the industry dominating Makita Li-ion technology. The expanded range offers a comprehensive, faster, lighter, more powerful and longer lasting selection of tough professional cordless tools.

LITHIUM-ION

The Makita power tool range is a blend of tried and trusted products, together with some valuable innovations, carefully selected for the demanding needs of professional users.

RANGE CATALOGUE

valid from January 2009

New innovations such as Makita's ground breaking AVT and the innovative Lithium-ion battery technology are just a few of the technologies that have kept Makita the preferred choice of the professional.

22 MINUTE CHARGE TIME

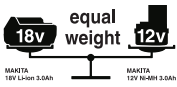

A REVOLUTIONARY BATTERY TECHNOLOGY

Makita's Lithium-ion tools have proved market winners and now Makita's expanded range offers a comprehensive, powerful and lightweight selection of professional tools to complete any job.

The long-lasting Lithium-ion batteries are 40% lighter than a similar Nickel Metal Hydride (Ni-MH) battery. Lithium-ion batteries feature a high energy density technology that will deliver 430% more working capacity during the lifetime of this battery compared to traditional Ni-Cad batteries. Lithium-ion batteries have an extended length of time during which they hold their charge – even after a long period of storage the batteries will deliver their power.

MORE POWER LESS WEIGHT

Lithium-ion's weight saving means 18 volt power can be obtained by a battery that weighs the same as a 12 volt Ni-MH battery. Reducing weight whilst retaining power has obvious positive effects on operator fatigue.

EXTENDED BATTERY LIFE

Lithium-ion batteries have greater life spans than their Ni-MH or Ni-Cad counterparts this is due to the increased number of charging cycles Lithium-ion offers and the run time between charges.

2000+ CYCLES TESTED UNDER LOAD

Makita have obtained the cycle life figure of 2000+ by testing the Lithium-ion 18v 3.0Ah battery under load. 50mm tapping screws were screwed into standard pine, replicating actual use conditions.

OPTIMUM CHARGING

Makita can achieve the massive 2000+ cycles from their Lithium-ion batteries because of the Optimum Charging System. This unique charging system enables the battery and charging system to talk to each other via a built in CPU in the charger and CPU in the battery. These two key elements are vital in extending the batteries working life.

Through this two way communication between charger and battery, the charger can recognise the battery and recall its charging history, analyse the batteries condition and usage and charge the battery accordingly.

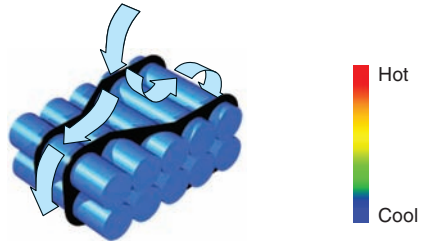

AIR FLOW AROUND THE BATTERY

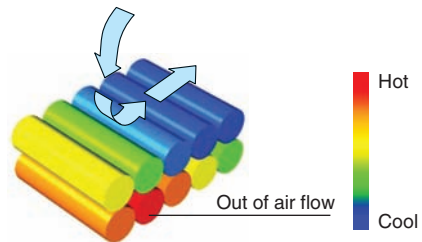

For optimum efficiency battery cells need to be kept at a cool temperature during charging. To enable each cell in the battery to be cooled the unit needs to be designed in such a way that air flow around the battery is maximised. Unlike some other Lithium-ion battery types the Makita battery design allows each cell to be kept at an optimum temperature which extends the battery life.

Unbalanced cooling will give rise to cells who's capacities vary and discharge at different rates, this can result in a battery that has a reduced run time, cycle life and capacity.

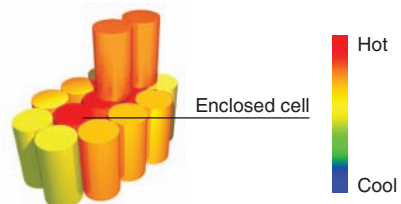

Makita Lithium-ion batteries have balanced cooling = LONG LIFE.

Unbalanced cooling = SHORT LIFE.

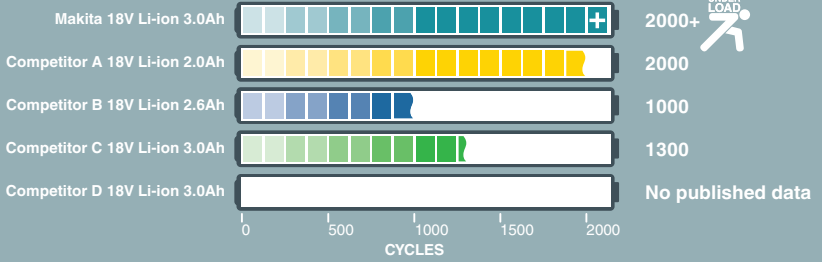

Without cooling = SHORT LIFE.

**1
YEAR
GUARANTEE**

Every Makita Tool is thoroughly inspected and tested before leaving the factory and is guaranteed to be free of defects from workmanship and materials for the period of ONE YEAR from the date of original purchase. Should any trouble develop during this one year period, return the COMPLETE tool, freight prepaid, to EITHER an Authorised Makita Service Agent OR to Makita (UK) Ltd. If inspection shows the trouble is caused by defective workmanship or material, Makita will repair WITHOUT CHARGE.

This guarantee does not apply where:

- Repairs have been made or attempted by others.
- Repairs are required because of normal wear and tear.
- The tool has been abused, misused or improperly maintained.
- Alterations have been made to the tool.
- This guarantee does not affect your statutory rights.

WARNING: COUNTERFEIT TOOLS

Many fake Makita Tools are being offered for sale. Don't fall for the short term saving, they are low quality, without warranty, and have a minimal professional life. Buy only genuine Makita Tools through a reputable dealer.
